

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application.

Listing of Claims:

1. (Currently Amended) A method of selecting a number or address from a list stored in a telecommunications device for initiating a call or sending a message from the telecommunications device to the number or address, the list comprising names and one or more numbers or addresses corresponding to each name, the method comprising:

displaying a list comprising at least some of the stored names, one of the names in the list being highlighted,

~~highlighting one of the names displayed in the list; and~~

~~displaying the highlighted name~~ the highlighted name being displayed in the list together with a default one of the one or more numbers and/or addresses corresponding to the high-lighted name.

2. (Previously Presented) A method according to claim 1, further comprising displaying together with the default number or address an indication of whether the list comprises further numbers or addresses corresponding to the highlighted name in addition to the displayed number or address.

3. (Previously Presented) A method according to claim 1, further comprising selecting the displayed default number or address, if it is indicated that this number or address is the only number or address in the list corresponding to the highlighted name.

4. (Previously Presented) A method according to claim 2, comprising:
scrolling, if it is indicated that the list comprises more than one number or address corresponding to the highlighted name, and if the displayed default number or address is not the one to which a call should be initiated or a message sent, through the numbers or

addresses corresponding to the selected name by means of a 4-way navigation device until the number or address to which a call should be initiated or a message sent is displayed; and

selecting, when the number or address to which a call should be initiated or a message sent is displayed, the displayed number.

5. (Previously Presented) A method according to claim 1, wherein the default one of the one or more numbers or addresses corresponding to the highlighted name is selected based on a mode of the telecommunications device.

6. (Currently Amended) A telecommunications device configured to select a number or address from a list stored in the telecommunications device for initiating a call or sending a message from the telecommunications device to the number or address, the list comprising names and one or more numbers or addresses corresponding to each name, the telecommunications device being configured to:

display a list comprising at least some of the stored names, one of the names in the list being highlighted,

~~highlight one of the names displayed in the list, and~~

~~display~~ the highlighted name being displayed in the list together with a default one of the one or more numbers and/or addresses corresponding to the highlighted name.

7. (Previously Presented) A telecommunications device according to claim 6, wherein the device is further configured to display together with the default number or address an indication of whether the list comprises further numbers or addresses corresponding to the highlighted name in addition to the displayed number or address.

8. (Previously Presented) A telecommunications device according to claim 6 wherein the device is further configured to select the displayed default number or address, if it is indicated that this number or address is the only number or address in the list corresponding to the highlighted name.

9. (Previously Presented) A telecommunications device according to claim 7, wherein the device is further configured to:

scroll, if the list comprises more than one number or address corresponding to the highlighted name, and if the displayed default number or address is not the one to which a call should be initiated or a message sent, through the numbers or addresses corresponding to the selected name by means of a 4-way navigation device until the number or address to which a call should be initiated or a message sent is displayed; and

select, when the number or address to which a call should be initiated or a message sent is displayed, the displayed number.

10. (Previously Presented) A telecommunications device according to claim 6, wherein the default one of the one or more numbers or addresses corresponding to the highlighted name is selected based on a mode of the telecommunications device.

11. (Previously Presented) A method according to claim 1 wherein displaying the highlighted name in the list together with a default one of the one or more numbers and/or addresses corresponding to the high-lighted name includes displaying the highlighted name in the list with only one default one of the one or more numbers and/or addresses corresponding to the highlighted name.

12. (Previously Presented) A method according to claim 11 wherein the highlighted name and the default one of the one or more numbers and/or addresses corresponding to the highlighted name is displayed concurrently on a single display.

13. (Previously Presented) A telecommunications device according to claim 6, wherein the device is further configured to display the highlighted name in the list with only one default one of the one or more numbers and/or addresses corresponding to the highlighted name.

14. (Previously Presented) A telecommunications device according to claim 13, wherein the device is further configured to display the highlighted name and the default one of the one or more numbers and/or addresses corresponding to the highlighted name on a single display.

15. (New) A method according to claim 1, wherein the list of names, the highlighted name in the list of names and the default one of the one or more numbers and/or addresses corresponding to the highlighted name are displayed concurrently on a single display.

16. (New) A telecommunications device according to claim 13, wherein the device is further configured to display the list of names, the highlighted name in the list of names and the default one of the one or more numbers and/or addresses corresponding to the highlighted name concurrently on a single display.
